

# GILLETTE GENERATORS

PORTABLE MODEL

**EVTD-65EK**

60 HERTZ

## “EV” SERIES EMERGENCY VEHICLE COMPARTMENT STYLE GEN-SETS

**EVTD-65EK** (Air Cooled Diesel) is intended for permanent installation into emergency vehicle compartments. These sets are mounted on a “Drip Pan” flat base with pre-mounted vibration isolators and control panel wiring. The “**EVTD**” models must be mounted by the installer near the diesel fuel source as no fuel tank is provided. All sets must use the vehicle 12 VDC battery for gen-set electric starting power. The gen-set is air-cooled so it must be mounted on a slide-out tray and brought into free cooling air before use.

| SPECIFICATIONS<br>( ALL LISTED ITEMS ARE<br>STANDARD EQUIPMENT<br>ON EACH GEN-SET. ) | DIESEL FUEL, SINGLE PHASE, 60 HERTZ, 120/240 VOLTS  |
